

What American Values Are The Most Important To You? – Part 2

In part one of this assignment, you used a set of 10 values cards to explore your own personal values. Now you will ask a parent, guardian or other family member between the ages of 30 and 60 years old to rank the values. If you want valid data, it is important that you avoid influencing the participant's response. After the family member is done, interview him or her and record his or her response below. Making an audio or video recording of the interview will earn extra credit.
