

### What American Values Are The Most Important To You - Part 3

*In Part 1 of this assignment, you used a set of 10 values cards to explore your own personal values. Then you interviewed a parent or family member of the previous generation who also ranked the same 10 values. Now, you will ask a grandparent or other family member that is 60 years old or older to do the same. Remember, if you want valid data, it is important that you avoid influencing the participant's response. After the participant is done, interview him or her and record responses below. Making an audio or video recording of the interview will earn extra credit).*
